Prepared by:

January 2007

Contents

Appendix A: Stakeholder Survey Questionnaire.....	A-1
Appendix B: Functional Requirements	B-1
Appendix C: Architecture Interconnect Diagrams	C-1
Appendix D: Architecture Flows.....	D-1

Appendix A: Stakeholder Survey Questionnaire

Before completing this survey, please provide the following information:

Name: _____

Title: _____

Agency: _____

Division: _____

Phone: _____

Fax: _____

E-mail: _____

Questionnaire

The questionnaire is organized by the following sections:

- A. General Questions
- B. Data Management and Archiving
- C. Roadway Operations – including freeway and arterial management and operations
- D. Roadway Maintenance – including general roadway maintenance, winter maintenance, and work zone activities
- E. Transportation Security
- F. Incident & Emergency Management
- G. Transit Operations
- H. Commercial Vehicle Operations

Instructions

You are not required to fill out the entire survey questionnaire. To save your time, a matrix shown below is developed to instruct which sections of the questionnaire you should complete. Please fill out the sections of the questionnaire that are applicable to you. You are certainly welcome to fill out other sections and provide additional information.

Type of Agency	Section							
	A	B	C	D	E	F	G	H
Transportation Agency (Public Works Departments, Engineers Office, Maintenance, etc.)	X	X	X	X	X			
Law Enforcement and Emergency Management Agency (Motor Vehicle Enforcement, Sheriff Department, Police Department, Fire Department, Emergency Management Agency, Emergency Medical Services, etc.)	X	X			X	X		X
Planning, Research and Information Technology	X	X	X	X	X	X	X	X
Public Transportation Agency	X	X					X	
Data Archives/Data Management Agency	X	X						
Others	X	X						

A. General Questions

1. Within the next 10 years, is your agency planning any major projects, including but not limited to traffic management centers, dispatch centers, highway improvements, transit vehicles, communications infrastructure, etc.

YES NO

If YES, please describe the project(s) and/or provide project name(s) and available documentation source(s).

2. Does your agency exchange voice or data information (including by telephone or fax) with any of the following types of organizations/agencies? Please select all that apply and list the appropriate organizations/agencies by name.

Incident/Emergency _____

Freeway _____

Arterial or Non-Freeway _____

Maintenance and Construction _____

Public Transportation _____

Commercial Vehicle Operations/Inspection_____

3. What specific types of information do you share with these organizations/agencies?

Incident/Emergency_____

Freeway_____

Arterial or Non-Freeway _____

Maintenance and Construction_____

Public Transportation_____

Commercial Vehicle Operations/Inspection_____

4. Does your agency disseminate (or plan to disseminate) traffic or weather condition information in any of the following ways?

- Dynamic Message Signs (DMS) (permanent or portable) EXISTING PLANNED
- Highway Advisory Radio (HAR) EXISTING PLANNED
- In-Vehicle Navigation Systems EXISTING PLANNED
- TV/Radio EXISTING PLANNED
- Internet EXISTING PLANNED
- Kiosks EXISTING PLANNED
- E-mail EXISTING PLANNED
- 511 or Other Telephone Services EXISTING PLANNED
- Pager or Personal Data Assistants (PDAs) EXISTING PLANNED
- DMS controlling parking access EXISTING PLANNED
- Other _____

5. Does your agency have (or plan to have) the capability to provide any of the following information?

- a. Broadcast of Static or Real-Time Traffic, Transit, or Maintenance and Construction Information? EXISTING PLANNED NO
- b. Personalized provision of Traffic, Transit, or Maintenance and Construction Information to users? EXISTING PLANNED NO
- c. Route Guidance (either pre-trip or enroute)? EXISTING PLANNED NO
- d. Yellow Pages Information or Reservation? EXISTING PLANNED NO

6. Please list any current agreements or memoranda of understanding that your agency has in place with any other organizations/agencies (e.g., maintenance of traffic signals, media agreements).

-
-
- Emission Data EXISTING PLANNED

-
-
- Parking Data EXISTING PLANNED

-
-
- Other _____

2. Does your archived data management system provide general query and report functionality?

- EXISTING PLANNED NO

3. Does your archived data management system provide advanced features such as data analysis, summarization, and data mining to facilitate discovery of information, patterns, and correlations in large data sets?

- EXISTING PLANNED NO

Additional Information / Comments

C. Roadway Operations

1. Does your agency use (or plan to use) any of the following real-time traffic data collection technologies?

- Loop Detectors that provide volume and speed data at midblock locations (this **excludes** actuators on intersection approaches)

EXISTING PLANNED

- CCTV Cameras EXISTING PLANNED

- Vehicle Probe Readers to estimate travel times on arterials

EXISTING PLANNED

- Road Weather Information System EXISTING PLANNED

- Overheight Vehicle Detection EXISTING PLANNED

- Other _____

2. Does your agency detect and verify (or plan to detect and verify) traffic incidents?

EXISTING PLANNED NO

3. Does your agency operate (or plan to add) lane control devices (e.g., changeable overhead directional arrows)?

EXISTING PLANNED NO

4. Does your agency manage (or plan to manage) automatic or remotely controlled gates or barriers that control access to roadway segments including ramps and traffic lanes?

EXISTING PLANNED NO

5. Does your agency operate (or plan to add) ramp meters on freeway entrances?

YES NO

If YES, please indicate what is (or will be) used:

- Pre-emption for emergency vehicles EXISTING PLANNED
- Priority for transit vehicles EXISTING PLANNED

6. Does your agency control (or plan to control) any signalized intersections?

YES NO

If NO, skip to Section E.

If YES, do any of your signalized intersections have (or plan to have):

- Closed Loop or Centralized Control EXISTING PLANNED
- Real-Time traffic adaptive control
 such as SCOOT/SCATS or similar EXISTING PLANNED
- Signal Preemption for emergency vehicles EXISTING PLANNED
- Signal Priority for Transit Vehicles EXISTING PLANNED
- Wireless Communications EXISTING PLANNED
- Other _____

7. Does your agency have (or plan to have) any signalized intersections that are interconnected with active railroad crossing devices?

EXISTING PLANNED NO

8. Does your agency monitor highway-rail intersections with any of the following technologies?

- Vehicle Detectors EXISTING PLANNED
- Video Surveillance/Detection EXISTING PLANNED
- Train Arrival Prediction
 (Predict Train Arrival Electronically) EXISTING PLANNED
- Electronic Traffic Violator Devices EXISTING PLANNED
- Other _____

Additional Information / Comments

D. Roadway Maintenance

1. Does your agency provide or support (or plan to provide or support) on-going operations and maintenance activities?

EXISTING PLANNED NO

2. Does your agency have (or plan to have) a vehicle fleet?

EXISTING PLANNED NO

If NO, skip to question #7.

If EXISTING or PLANNED:

What is the primary function? _____

Secondary function? _____

3. Does your agency operate or maintain (or plan to operate or maintain) a dispatch facility?

EXISTING PLANNED NO

4. Does your agency use (or plan to use) an Automated Vehicle Location (AVL) system?

EXISTING PLANNED NO

5. Does your agency provide (or plan to provide) maintenance of the vehicles in your fleet?

EXISTING PLANNED NO

6. Does your agency have (or plan to have) the capability to automate vehicle maintenance scheduling and manage both routine and corrective maintenance activities on vehicles?

EXISTING PLANNED NO

7. Does your agency collect (or plan to collect) road and weather conditions data from environmental sensors located on or near the roadway?

EXISTING PLANNED NO

8. Does your agency receive (or plan to receive) information from the National Weather Service?

EXISTING PLANNED NO

Additional Information / Comments

E. Transportation Security

1. Does your agency monitor (or plan to monitor) the transportation infrastructure (e.g., bridges, tunnels, and management centers) for potential threats using sensors and surveillance equipment?

- EXISTING PLANNED NO

2. Does your agency remotely control (or plan to remotely control) barrier and safeguard systems to preclude an incident, control access during and after an incident or mitigate the impact of an incident?

- EXISTING PLANNED NO

3. Does your agency monitor (or plan to monitor) public travel-related areas such as transit stations, transit stops, rest stops, and kiosk locations for potential threats using sensors and surveillance equipment?

- EXISTING PLANNED NO

4. Does your agency use (or plan to use) ITS devices and traveler information systems (such as dynamic message signs, highway advisory radio, 511 or other telephone services, TV/radios, Internet, e-mail, and kiosks) to alert the public in emergency situations such as child abductions, severe weather events, civil emergencies, and other situations that pose a threat to life and property?

- EXISTING PLANNED NO

5. Does your agency use (or plan to use) sensors and surveillance equipment to monitor and detect potential, looming, and actual disasters including natural disasters and

technological and man-made disasters (hazardous materials incidents, nuclear, chemical, biological, and radiological attacks) and notify all responding agencies of detected emergencies?

EXISTING PLANNED NO

6. Does your agency support (or plan to support) disaster response and recovery, including coordination of emergency response plans and resources, damage assessment, service restoration, and transition back to normal operation?

EXISTING PLANNED NO

7. Does your agency support (or plan to support) evacuation of the general public from a disaster area and manage subsequent reentry to the disaster area using transportation resources?

EXISTING PLANNED NO

8. Does your agency provide (or plan to provide) disaster-related traveler information to the general public, regarding evacuation and reentry information and other information concerning the operation and availability of the transportation system during a disaster?

EXISTING PLANNED NO

Additional Information / Comments

F. Incident/Emergency Management

1. Does your agency currently perform (or plan to perform) Computer Aided Dispatch (CAD) of emergency vehicles?

EXISTING PLANNED NO

2. Does your agency use (or plan to use) an Automated Vehicle Location (AVL) system?

EXISTING PLANNED NO

3. Does your agency receive (or plan to receive) incident data from an arterial, freeway, transit, or other emergency management agencies?

Arterial Management: EXISTING PLANNED NO

Freeway Management: EXISTING PLANNED NO

Maintenance and Construction: EXISTING PLANNED NO

Transit Agency(ies): EXISTING PLANNED NO

Other Emergency Management: EXISTING PLANNED NO

Other _____

4. Does your agency send (or plan to send) incident data to an arterial, freeway, transit, or other emergency management agencies?

Arterial Management: EXISTING PLANNED NO

Freeway Management: EXISTING PLANNED NO

Maintenance and Construction: EXISTING PLANNED NO

Transit Agency(ies): EXISTING PLANNED NO

Other Emergency Management: EXISTING PLANNED NO

Other _____

5. Does your agency have (or plan to have) preemption lights for signalized intersections or ramp meters?

EXISTING PLANNED NO

6. Does your agency receive (or plan to receive) real-time traffic information and conditions from transportation agencies to support and enhance emergency vehicle routing?

4. Does your agency use (or plan to use) an Automated Vehicle Location (AVL) system?

EXISTING PLANNED NO

5. Does your agency have (or plan to have) security monitoring systems on-board transit vehicles?

EXISTING PLANNED NO

6. Does your agency monitor (or plan to monitor) public areas (e.g. stops, park & ride lots, stations) using sensors and surveillance equipment?

EXISTING PLANNED NO

7. Does your agency use sensors and surveillance equipment to perform security monitoring (or plan to monitor) non-public areas (e.g. transit yards or other infrastructure)?

EXISTING PLANNED NO

8. Does your agency directly or indirectly (i.e., thru another agency/) provide (or plan to provide) transit information to the public?

YES NO

If YES, please identify below the method(s) currently used or planned for provide transit information:

- Internet Web Page EXISTING PLANNED
- Pagers or Personal Data Assistants EXISTING PLANNED
- Kiosks EXISTING PLANNED
- Display/Audio in Transit Vehicles EXISTING PLANNED
- E-mail or other direct PC communications EXISTING PLANNED
- Electronic Displays/Audio Announcements at Transit Stops and Stations (includes video monitors) EXISTING PLANNED
- TV (interactive or dedicated Cable) EXISTING PLANNED
- Other _____

9. Does your agency provide (or plan to provide) real-time transit information (i.e., latest available information on transit routes, schedules, transfer options, bicycle accessibility, fares, real-time schedule adherence, etc.) at stops or parking facilities?

EXISTING PLANNED NO

10. Does your agency provide transit trip planning?

YES NO

If YES, please identify below the method(s) currently used or planned for provide the trip planning information:

- Internet EXISTING PLANNED
- E-mail or other direct PC communications EXISTING PLANNED
- Kiosks EXISTING PLANNED
- Other _____

11. Does your agency have (or plan to have) an Electronic Fare Payment System (smart card, swipe card, credit card, etc.)?

EXISTING PLANNED NO

12. Does your transit vehicles have (or plan to have) the capability to receive priority lights at signalized intersections?

EXISTING PLANNED NO

Additional Information / Comments

H. Commercial Vehicle Operations

1. Does your agency perform (or plan to perform) electronic credential administrative services for commercial vehicles?

EXISTING PLANNED NO

2. Does your agency participate (or plan to participate) in roadside commercial vehicle inspection?

EXISTING PLANNED NO

If NO, no further responses are required in this section.

3. Does your agency perform (or plan to perform) electronic screening?

EXISTING PLANNED NO

4. Does your agency exchange (or plan to exchange) safety and/or security information?

EXISTING PLANNED NO

5. Does your agency perform (or plan to perform) a high speed weigh-in-motion service?

EXISTING PLANNED NO

6. Does your agency participate (or plan to participate) in HAZMAT detection?

EXISTING PLANNED NO

If EXISTING or PLANNED, please list any handheld or roadside equipment for detection and classification of security sensitive HAZMAT on commercial vehicles, and for accessing credentials information on driver verification.

Appendix B: Functional Requirements

Functional Requirements

AAMPO Regional ITS Architecture (Region)

Architecture	Status
AAMPO Regional ITS Architecture (Region)	(Region)
<i>Element: City of Ames CyRide</i>	
<i>Entity: Emergency Management</i>	
Functional Area: Center Secure Area Surveillance	
<i>Requirement:</i>	
3 The center shall remotely monitor video images and audio surveillance data collected on-board transit vehicles. The data may be raw or pre-processed in the field.	Existing
<i>Requirement:</i>	
5 The center shall identify potential security threats based on collected security surveillance data.	Existing
<i>Requirement:</i>	
9 The center shall remotely control security surveillance devices on-board transit vehicles.	Existing
<i>Requirement:</i>	
12 The center shall respond to control data from center personnel regarding security surveillance data collection, processing, threat	Existing
<i>Entity: Transit Management</i>	
Functional Area: Transit Center Vehicle Tracking	
<i>Requirement:</i>	
1 The center shall monitor the locations of all transit vehicles within its network.	Planned
<i>Requirement:</i>	
2 The center shall determine adherence of transit vehicles to their assigned schedule.	Planned
<i>Requirement:</i>	
3 The center shall support an interface with a map update provider, or other appropriate data sources, through which updates of digitized map data can be obtained and used as a background for transit tracking and dispatch.	Planned
<i>Requirement:</i>	
4 The center shall provide transit operational data to traveler information service providers.	Planned
Functional Area: Transit Center Fixed-Route Operations	
<i>Requirement:</i>	
1 The center shall generate transit routes and schedules based on such factors as parameters input by the system operator, road network conditions, operational data on current routes and schedules, and digitized map data.	Planned
<i>Requirement:</i>	
2 The center shall provide the interface to the system operator to control the generation of new routes and schedules (transit services) including the ability to review and update the parameters used by the routes and schedules generation processes	Planned
<i>Requirement:</i>	
3 The center shall be able to generate special routes and schedules to support an incident, disaster, evacuation, or other emergency.	Planned
<i>Requirement:</i>	
4 The center shall dispatch fixed route or flexible route transit vehicles	Planned
<i>Requirement:</i>	
5 The center shall collect transit operational data for use in the generation of routes and schedules.	Planned
<i>Requirement:</i>	
6 The center shall provide instructions or corrective actions to the transit vehicle operators based upon operational needs.	Planned

Architecture	Status	
AAMPO Regional ITS Architecture (Region)	(Region)	
<i>Element:</i> City of Ames CyRide		
<i>Entity:</i> Transit Management	Functional Requirements	
<i>Functional Area:</i> Transit Center Fixed-Route Operations		
<i>Requirement:</i> 8	The center shall generate the necessary corrective actions which may involve more than the vehicles concerned and more far reaching action, such as, the introduction of extra vehicles, wide area signal priority by traffic management, the premature termination of some services, etc.	Planned
<i>Requirement:</i> 9	The center shall exchange information with Maintenance and Construction Operations concerning work zones, roadway conditions, asset restrictions, work plans, etc.	Existing
<i>Requirement:</i> 10	The center shall disseminate up-to-date schedules and route information to other centers for fixed and flexible route services.	Planned
<i>Functional Area:</i> Transit Center Security		
<i>Requirement:</i> 1	The center shall monitor transit vehicle operational data to determine if the transit vehicle is off-route and assess whether a security incident is occurring.	Planned
<i>Requirement:</i> 2	The center shall receive reports of emergencies on-board transit vehicles entered directly by the transit vehicle operator or from a traveler through interfaces such as panic buttons or alarm switches.	Existing
<i>Requirement:</i> 3	The center shall support the back-office portion of functionality to authenticate transit vehicle operators.	Planned
<i>Requirement:</i> 5	The center shall receive information pertaining to a wide-area alert such as weather alerts, disaster situations, or child abductions. This information may come from Emergency Management or from other Alerting and Advisory Systems.	Planned
<i>Requirement:</i> 6	The center shall send wide-area alert information to travelers (on-board transit vehicles or at stations/stops) and transit vehicle operators.	Planned
<i>Requirement:</i> 7	The center shall coordinate the response to security incidents involving transit with other agencies including Emergency Management, other transit agencies, media, traffic management, and traveler information service providers.	Existing
<i>Functional Area:</i> Transit Vehicle Operator Scheduling		
<i>Requirement:</i> 1	The center shall maintain records of a transit vehicle operator's performance. This may be done utilizing standardized performance evaluation criteria set forth by governmental regulations and transit operating company policies, assessing the transit vehicle operator's driving history, and assessing comments from the transit vehicle operator's supervisor(s) as well as noting any moving violations or accidents, supervisor comments,	Existing
<i>Requirement:</i> 2	The center shall assess the transit vehicle operator's availability based on previous work assignments, accumulated hours, plus health and vacation commitments.	Existing
<i>Requirement:</i> 3	The center shall assign transit vehicle operators to transit schedules based on their eligibility, route preferences, seniority, and transit vehicle availability.	Existing

Architecture	Status
AAMPO Regional ITS Architecture (Region)	(Region)
<i>Element: City of Ames CyRide</i>	
<i>Entity: Transit Management</i>	Functional Requirements
<i>Functional Area: Transit Vehicle Operator Scheduling</i>	
<i>Requirement:</i> 4 The center shall provide an interface through which the transit vehicle operator information can be maintained - either from the transit vehicle operator, a transit system operator (i.e. center personnel), or other functions.	Existing
<i>Functional Area: Transit Garage Maintenance</i>	
<i>Requirement:</i> 1 The center shall collect operational and maintenance data from transit vehicles.	Planned
<i>Requirement:</i> 2 The center shall monitor the condition of a transit vehicle to analyze brake, drive train, sensors, fuel, steering, tire, processor, communications equipment, and transit vehicle mileage to identify mileage based maintenance, out-of-specification or imminent failure conditions.	Planned
<i>Requirement:</i> 3 The center shall generate transit vehicle maintenance schedules, includes what and when the maintenance or repair is to be performed.	Planned
<i>Requirement:</i> 4 The center shall generate transit vehicle availability listings, current and forecast, to support transit vehicle assignment planning based, in part, on the transit vehicle maintenance schedule.	Planned
<i>Requirement:</i> 5 The center shall assign technicians to a transit vehicle maintenance schedule, based upon such factors as personnel eligibility, work assignments, preferences and seniority.	Planned
<i>Requirement:</i> 6 The center shall verify that the transit vehicle maintenance activities were performed correctly, using the transit vehicle's status, the maintenance personnel's work assignment, and the transit maintenance schedules.	Planned
<i>Requirement:</i> 7 The center shall generate a time-stamped maintenance log of all maintenance activities performed on a transit vehicle.	Planned
<i>Requirement:</i> 8 The center shall provide the transit system operator with the capability to update transit vehicle maintenance information and receive reports on all transit vehicle operations data.	Planned
<i>Functional Area: Transit Center Information Services</i>	
<i>Requirement:</i> 1 The center shall provide travelers using public transportation with traffic and advisory information upon request. Such information may include transit routes, schedules, transfer options, fares, real-time schedule adherence, current incidents, weather conditions, and special events.	Planned
<i>Requirement:</i> 2 The center shall provide transit information to the media including details of deviations from schedule of regular transit services.	Planned
<i>Requirement:</i> 3 The center shall exchange transit schedules, real-time arrival information, fare schedules, and general transit service information with other transit organizations to support transit traveler information systems.	Planned
<i>Requirement:</i> 4 The center shall provide transit service information to traveler information service providers including routes, schedules, schedule adherence, and fare information as well as transit service information during evacuation.	Planned

Architecture	Status	
AAMPO Regional ITS Architecture (Region)	(Region)	
<i>Element: City of Ames CyRide</i>		
<i>Entity: Transit Management</i>	Functional Requirements	
<i>Functional Area: Transit Center Information Services</i>		
<i>Requirement:</i> 6	The center shall broadcast transit advisory data, including alerts and advisories pertaining to major emergencies, or man made disasters.	Planned
<i>Functional Area: Transit Center Multi-Modal Coordination</i>		
<i>Requirement:</i> 1	The center shall analyze transit vehicle schedule performance to determine the need for priority along certain routes or at certain intersections.	Planned
<i>Requirement:</i> 2	The center shall send requests for priority along routes or at intersections to traffic management.	Planned
<i>Requirement:</i> 3	The center shall coordinate schedules and services between transit agencies, traffic management, maintenance and construction operations, parking management, and other surface or air transportation modes.	Planned
<i>Requirement:</i> 5	The center shall accept requests from traffic management to change routes and schedules as part of the implementation of demand management strategies.	Planned
<i>Functional Area: Transit Evacuation Support</i>		
<i>Requirement:</i> 1	The center shall manage the use of transit resources to support evacuation and subsequent reentry of a population in the vicinity of a disaster or other emergency.	Planned
<i>Requirement:</i> 2	The center shall coordinate regional evacuation plans with Emergency Management - identifying the transit role in an evacuation and the transit resources that would be used.	Planned
<i>Requirement:</i> 3	The center shall coordinate the use of transit and school bus fleets during an evacuation, supporting evacuation of those with special needs and the general population.	Planned
<i>Requirement:</i> 4	The center shall adjust and update transit service and fare schedules and provide that information to other agencies as they coordinate evacuations.	Planned
<i>Functional Area: Transit Data Collection</i>		
<i>Requirement:</i> 1	The center shall collect transit management data such as transit fares and passenger use, transit services, paratransit operations, transit vehicle maintenance data, etc.	Planned
<i>Requirement:</i> 2	The center shall assign quality control metrics and meta-data to be stored along with the data. Meta-data may include attributes that describe the source and quality of the data and the conditions surrounding the collection of the data.	Planned
<i>Requirement:</i> 3	The center shall receive and respond to requests from ITS Archives for either a catalog of the transit data or for the data itself.	Planned
<i>Requirement:</i> 4	The center shall be able to produce sample products of the data available.	Planned
<i>Element: City of Ames CyRide Bus Stop Electronic Displays/Audio Announcement</i>		
<i>Entity: Remote Traveler Support</i>		
<i>Functional Area: Remote Transit Information Services</i>		

Architecture	Status
AAMPO Regional ITS Architecture (Region)	(Region)
<i>Element:</i> City of Ames CyRide Bus Stop Electronic Displays/Audio Announcement	
<i>Entity:</i> Remote Traveler Support	Functional Requirements
<i>Functional Area:</i> Remote Transit Information Services	
<i>Requirement:</i>	
1 The public interface for travelers shall collect and provide real-time travel-related information at transit stops, multi-modal transfer points, and other public transportation areas.	Planned
<i>Requirement:</i>	
2 The public interface for travelers shall collect and present to the transit traveler information on transit routes, schedules, and real-time schedule adherence.	Planned
<i>Requirement:</i>	
3 The public interface for travelers shall provide support for general annunciation and/or display of imminent arrival information and other information of general interest to transit users.	Planned
<i>Requirement:</i>	
4 The public interface for travelers shall present information to the traveler in a form suitable for travelers with physical disabilities.	Planned
<i>Element:</i> City of Ames CyRide Transit Database	
<i>Entity:</i> Archived Data Management Subsystem	
<i>Functional Area:</i> ITS Data Repository	
<i>Requirement:</i>	
1 The center shall collect data to be archived from one or more data sources.	Planned
<i>Requirement:</i>	
2 The center shall collect data catalogs from one or more data sources. A catalog describes the data contained in the collection of archived data and may include descriptions of the schema or structure of the data, a description of the contents of the data; e.g., time range of entries, number of entries; or a sample of the data (e. g. a thumbnail).	Planned
<i>Requirement:</i>	
3 The center shall store the archived data in a focused repository that is suited to a particular set of ITS data users.	Planned
<i>Requirement:</i>	
4 The center shall include capabilities for performing quality checks on the incoming archived data.	Planned
<i>Requirement:</i>	
5 The center shall include capabilities for error notification on the incoming archived data.	Planned
<i>Requirement:</i>	
9 The center shall provide the capability to execute methods on the incoming data such as cleansing, summarizations, aggregations, or transformations applied to the data before it is stored in the archive.	Planned
<i>Requirement:</i>	
10 The center shall respond to requests from the administrator interface function to maintain the archive data.	Planned
<i>Requirement:</i>	
11 When data or a catalog of data is received from the archive, the center shall generate the requested data product for the users systems.	Planned
<i>Functional Area:</i> Government Reporting Systems Support	
<i>Requirement:</i>	
1 The center shall provide data from an ITS archive to federal, state, or local government reporting systems.	Planned
<i>Requirement:</i>	
2 The center shall provide the capability to select data from an ITS archive for use in government reports.	Planned
<i>Requirement:</i>	
3 The center shall provide the capability to format data from an ITS archive suitable for input into government reports.	Planned

Architecture	Status	
AAMPO Regional ITS Architecture (Region)	(Region)	
<i>Element:</i> City of Ames CyRide Transit Database		
<i>Entity:</i> Archived Data Management Subsystem		
Functional Requirements		
<i>Functional Area:</i> Government Reporting Systems Support		
<i>Requirement:</i>	4 The center shall support requests for ITS archived data from Government Reporting Systems.	Planned
<i>Requirement:</i>	5 The center shall provide the applicable meta-data for any ITS archived data to satisfy government reporting system requests. Meta-data may include attributes that describe the source and quality of the data and the conditions surrounding the collection of the data.	Planned
<i>Element:</i> City of Ames CyRide Transit Information Website		
<i>Entity:</i> Information Service Provider		
<i>Functional Area:</i> ISP Traveler Data Collection		
<i>Requirement:</i>	3 The center shall collect, process, and store transit routes and schedules, transit transfer options, transit fares, and real-time schedule adherence information.	Existing
<i>Functional Area:</i> Basic Information Broadcast		
<i>Requirement:</i>	3 The center shall collect, process, store, and disseminate transit routes and schedules, transit transfer options, transit fares, and real-time schedule adherence information to travelers.	Existing
<i>Requirement:</i>	10 The center shall provide the capability for a system operator to control the type and update frequency of broadcast traveler information.	Existing
<i>Functional Area:</i> Interactive Infrastructure Information		
<i>Requirement:</i>	3 The center shall collect, process, store, and disseminate customized transit routes and schedules, transit transfer options, transit fares, and real-time schedule adherence information to travelers upon request.	Planned
<i>Requirement:</i>	10 The center shall provide all traveler information based on the traveler's current location or a specific location identified by the traveler, and filter or customize the provided information accordingly.	Planned
<i>Requirement:</i>	11 The center shall accept traveler profiles for determining the type of personalized data to send to the traveler.	Planned
<i>Requirement:</i>	17 The center shall provide the capability for a system operator to control the type and update frequency of traveler information.	Planned
<i>Functional Area:</i> Infrastructure Provided Trip Planning		
<i>Requirement:</i>	1 The center shall provide the capability to provide specific pre-trip and enroute directions to travelers (and drivers), including costs, arrival times, and transfer points.	Planned
<i>Requirement:</i>	7 The center shall generate route plans based on transit services, including fares, schedules, and requirements for travelers with special needs.	Planned
<i>Requirement:</i>	14 The center shall provide the capability for the traveler to confirm the proposed trip plan.	Planned

Architecture	Status	
AAMPO Regional ITS Architecture (Region)	(Region)	
<i>Element: City of Ames CyRide Transit Information Website</i>		
<i>Entity: Information Service Provider</i>	Functional Requirements	
Functional Area: Infrastructure Provided Trip Planning		
<i>Requirement:</i> 16	The center shall support an interface with a map update provider, or other appropriate data sources, through which updates of digitized map data can be obtained and used to determine vehicle and non-vehicle routes, trip planning, and on-line vehicle guidance.	Planned
<i>Requirement:</i> 17	The center shall provide the capability for center personnel to control route calculation parameters.	Planned
<i>Element: City of Ames CyRide Transit Vehicles</i>		
<i>Entity: Transit Vehicle Subsystem</i>		
Functional Area: On-board Transit Trip Monitoring		
<i>Requirement:</i> 1	The transit vehicle shall compute the location of the transit vehicle based on inputs from a vehicle location determination function.	Planned
<i>Requirement:</i> 2	The transit vehicle shall support the computation of the location of a transit vehicle using on-board sensors to augment the location determination function. This may include proximity to the transit stops or other known reference points as well as recording trip length.	Planned
<i>Requirement:</i> 3	The transit vehicle shall record transit trip monitoring data including vehicle mileage and fuel usage.	Planned
<i>Requirement:</i> 4	The transit vehicle shall record transit trip monitoring data including operational status information such as doors open/closed, passenger loading, running times, etc.	Planned
<i>Requirement:</i> 5	The transit vehicle shall send the transit vehicle trip monitoring data to center-based trip monitoring functions.	Planned
Functional Area: On-board Fixed Route Schedule Management		
<i>Requirement:</i> 1	The transit vehicle shall receive transit route information for its assigned route including transit service instructions, traffic information, road conditions, and other information for the operator.	Planned
Functional Area: On-board Transit Security		
<i>Requirement:</i> 1	The transit vehicle shall perform video and audio surveillance inside of transit vehicles and output raw video or audio data for either local monitoring (for processing or direct output to the transit vehicle operator), remote monitoring or for local storage (e.g., in an event recorder).	Existing
<i>Requirement:</i> 2	The transit vehicle shall perform local monitoring of video or audio surveillance data collected inside of transit vehicles, and identify potential incidents or threats based on received processing parameters.	Planned
<i>Requirement:</i> 3	The transit vehicle shall output an indication of potential incidents or threats and the processed video or audio information to the center along with the vehicle's current location.	Planned
<i>Requirement:</i> 8	The transit vehicle shall monitor and output surveillance and sensor equipment status and fault indications.	Existing

Architecture	Status
AAMPO Regional ITS Architecture (Region)	(Region)
<i>Element: City of Ames CyRide Transit Vehicles</i>	
<i>Entity: Transit Vehicle Subsystem</i>	Functional Requirements
<i>Functional Area: On-board Transit Security</i>	
<i>Requirement:</i> 9 The transit vehicle shall accept emergency inputs from either the transit vehicle operator or a traveler through such interfaces as panic buttons, silent or audible alarms, etc.	Existing
<i>Requirement:</i> 10 The transit vehicle shall output reported emergencies to the center.	Existing
<i>Requirement:</i> 11 The transit vehicle shall receive acknowledgments of the emergency request from the center and output this acknowledgment to the transit vehicle operator or to the travelers	Existing
<i>Requirement:</i> 12 The transit vehicle shall be capable of receiving an emergency message for broadcast to the travelers or to the transit vehicle operator.	Existing
<i>Requirement:</i> 13 The transit vehicle shall be capable of disabling or enabling the transit vehicle based on commands from the center or authentic inputs from the transit vehicle operator.	Existing
<i>Functional Area: On-board Maintenance</i>	
<i>Requirement:</i> 1 The transit vehicle shall collect and process vehicle mileage data available to sensors on-board.	Planned
<i>Requirement:</i> 3 The transit vehicle shall transmit vehicle maintenance data to the center to be used for scheduling future vehicle maintenance.	Planned
<i>Functional Area: On-board Transit Signal Priority</i>	
<i>Requirement:</i> 2 The transit vehicle shall send priority requests to traffic signal controllers at intersections, pedestrian crossings, and multimodal crossings on the roads (surface streets) and freeway (ramp controls) network that enable a transit vehicle schedule deviation to be corrected.	Planned
<i>Requirement:</i> 3 The transit vehicle shall send the schedule deviation data and status of priority requests to the transit vehicle operator.	Planned
<i>Entity: Vehicle</i>	
<i>Functional Area: Vehicle Location Determination</i>	
<i>Requirement:</i> 1 The vehicle shall provide the vehicle's current location to other in-vehicle functions.	Planned
<i>Requirement:</i> 2 The vehicle shall calculate the location from one or more sources of position data. These location referencing systems include position systems such as GPS, DGPS, odometer and differential odometers.	Planned
<i>Requirement:</i> 3 The vehicle shall refine its calculations as required by other in-vehicle functions.	Planned

AAMPO Regional ITS Architecture (Region)	(Region)
<i>Element:</i> City of Ames Public Works	
<i>Entity:</i> Maintenance and Construction Management	Functional Requirements
<i>Functional Area:</i> MCM Data Collection	
<i>Requirement:</i>	
1 The center shall collect maintenance and construction data (such as field equipment status, infrastructure status, maintenance and construction activity data) gathered from roadway, traffic, and other maintenance and construction sources.	Existing
<i>Requirement:</i>	
2 The center shall assign quality control metrics and meta-data to be stored along with the data. Meta-data may include attributes that describe the source and quality of the data and the conditions surrounding the collection of the data.	Existing
<i>Requirement:</i>	
3 The center shall receive and respond to requests from ITS Archives for either a catalog of the maintenance and construction data or for the data itself.	Existing
<i>Requirement:</i>	
4 The center shall be able to produce sample products of the data available.	Existing
<i>Requirement:</i>	
5 The center shall provide data to Asset Management to be used in updating the status of assets in the inventory.	Existing
<i>Entity:</i> Traffic Management	
<i>Functional Area:</i> Collect Traffic Surveillance	
<i>Requirement:</i>	
1 The center shall monitor, analyze, and store traffic sensor data (speed, volume, occupancy) collected from field elements under remote control of the center.	Existing
<i>Requirement:</i>	
2 The center shall monitor, analyze, and distribute traffic images from CCTV systems under remote control of the center.	Existing
<i>Requirement:</i>	
4 The center shall distribute road network conditions data (raw or processed) based on collected and analyzed traffic sensor and surveillance data to other centers.	Existing
<i>Requirement:</i>	
5 The center shall respond to control data from center personnel regarding sensor and surveillance data collection, analysis, storage, and distribution.	Existing
<i>Requirement:</i>	
6 The center shall maintain a database of surveillance and sensors and the freeways, surface street and rural roadways, e.g. where they are located, to which part(s) of the network their data applies, the type of data, and the ownership of each link (that is, the agency or entity responsible for collecting and storing surveillance of the link) in the network.	Existing
<i>Functional Area:</i> TMC Signal Control	
<i>Requirement:</i>	
1 The center shall remotely control traffic signal controllers.	Existing
<i>Requirement:</i>	
2 The center shall accept notifications of right-of-way requests from pedestrians.	Existing
<i>Requirement:</i>	
3 The center shall collect traffic signal controller operational status and compare against the control information sent by the center.	Existing
<i>Requirement:</i>	
4 The center shall collect traffic signal controller fault data from the field.	Existing

Architecture	Status
AAMPO Regional ITS Architecture (Region)	(Region)
<i>Element: City of Ames Public Works</i>	
<i>Entity: Traffic Management</i>	Functional Requirements
Functional Area: TMC Signal Control	
<i>Requirement:</i> 5	The center shall implement control plans to coordinate signalized intersections, under control of center personnel, based on data from sensors and surveillance monitoring traffic conditions, incidents, emergency vehicle preemptions, the passage of commercial vehicles with unusual loads, equipment faults, pedestrian crossings, etc.
	Existing
Functional Area: TMC Traffic Information Dissemination	
<i>Requirement:</i> 1	The center shall remotely control dynamic messages signs for dissemination of traffic and other information to drivers.
	Existing
<i>Requirement:</i> 3	The center shall collect operational status for the driver information systems equipment (DMS, HAR, etc.).
	Existing
<i>Requirement:</i> 4	The center shall collect fault data for the driver information systems equipment (DMS, HAR, etc.) for repair.
	Existing
<i>Requirement:</i> 5	The center shall retrieve locally stored traffic information, including current and forecasted traffic information, road and weather conditions, traffic incident information, information on diversions and alternate routes, closures, and special traffic restrictions (lane/shoulder use, weight restrictions, width restrictions, HOV requirements), etc.
	Existing
<i>Requirement:</i> 6	The center shall distribute traffic data to maintenance and construction centers, transit centers, emergency management centers, and traveler information providers.
	Existing
<i>Requirement:</i> 8	The center shall provide the capability for center personnel to control the nature of the data that is available to non-traffic operations centers and the media.
	Existing
Functional Area: TMC Incident Detection	
<i>Requirement:</i> 1	The center shall receive inputs from the Alerting and Advisory System concerning the possibility or occurrence of severe weather, terrorist activity, or other major emergency, including information provided by the Emergency Alert System.
	Existing
<i>Requirement:</i> 2	The center shall collect and store traffic flow and image data from the field equipment to detect and verify incidents.
	Planned
<i>Requirement:</i> 3	The center shall receive inputs concerning upcoming events that would effect the traffic network from event promoters, traveler information service providers, and intermodal freight depots.
	Existing
<i>Requirement:</i> 4	The center shall exchange incident and threat information with emergency management centers as well as maintenance and construction centers; including notification of existence of incident and expected severity, location, time and nature of incident.
	Existing
<i>Requirement:</i> 5	The center shall support requests from emergency management centers to remotely control sensor and surveillance equipment located in the field.
	Planned
<i>Requirement:</i> 6	The center shall provide road network conditions and traffic images to emergency management centers to support the detection, verification, and classification of incidents.
	Planned

Architecture	Status
AAMPO Regional ITS Architecture (Region)	(Region)
<i>Element: City of Ames Public Works</i>	
<i>Entity: Traffic Management</i>	Functional Requirements
Functional Area: TMC Incident Detection	
<i>Requirement:</i>	Planned
7 The center shall provide video and traffic sensor control commands to the field equipment to detect and verify incidents.	
Functional Area: TMC Incident Dispatch Coordination/Communication	
<i>Requirement:</i>	Existing
1 The center shall exchange alert information and status with emergency management centers. The information includes notification of a major emergency such as a natural or man-made disaster, civil emergency, or child abduction for distribution to the public. The information may include the alert originator, the nature of the emergency, the geographic area affected by the emergency, the effective time period, and information and instructions necessary for the public to respond to the alert. This may also identify specific information that should not be released to the public.	
<i>Requirement:</i>	Existing
2 The center shall coordinate planning for incidents with emergency management centers - including pre-planning activities for disaster response, evacuation, and recovery operations.	
<i>Requirement:</i>	Planned
3 The center shall support requests from emergency management centers to remotely control sensor and surveillance equipment located in the field, provide special routing for emergency vehicles, and to provide responding emergency vehicles with signal preemption.	
<i>Requirement:</i>	Existing
4 The center shall exchange incident and threat information with emergency management centers as well as maintenance and construction centers; including notification of existence of incident and expected severity, location, time and nature of incident.	
<i>Requirement:</i>	Existing
5 The center shall respond to requests from emergency management to provide traffic management resources to implement special traffic control measures, assist in clean up, verify an incident, etc. This may also involve coordination with maintenance centers.	
<i>Requirement:</i>	Existing
6 The center shall receive inputs concerning upcoming events that would effect the traffic network from event promoters, traveler information service providers, media, and rail operations centers.	
<i>Requirement:</i>	Planned
7 The center shall provide road network conditions and traffic images to emergency management centers, maintenance and construction centers, and traveler information service providers.	
<i>Requirement:</i>	Planned
9 The center shall coordinate information and controls with other traffic management centers.	
Functional Area: HRI Traffic Management	
<i>Requirement:</i>	Existing
1 The center shall remotely control highway-rail intersection (HRI) equipment located in the field.	
<i>Requirement:</i>	Existing
2 The center shall accept collect highway-rail intersection (HRI) advisory or alert data from rail operations centers.	
<i>Requirement:</i>	Existing
3 The center shall collect highway-rail intersection (HRI) equipment operational status and compare against the control information sent by the center.	

Architecture	Status

<i>Element:</i> Iowa DOT 511 Travel Information Website	
<i>Entity:</i> Information Service Provider	
<i>Functional Area:</i> Basic Information Broadcast	
<i>Requirement:</i>	Functional Requirements
10 The center shall provide the capability for a system operator to control the type and update frequency of broadcast traveler information.	Existing
<i>Functional Area:</i> ISP Emergency Traveler Information	
<i>Requirement:</i>	Existing
1 The center shall collect and provide to the traveler interface systems emergency evacuation information, including evacuation zones, shelter information, available transportation modes, road closures and detours, changes to transit services, and traffic and road conditions at the origin, destination, and along the evacuation routes.	Existing
<i>Requirement:</i>	Existing
2 The center shall provide evacuation information to shelter providers.	Existing
<i>Requirement:</i>	Existing
3 The center shall collect and provide wide-area alert information to the traveler interface system with region-specific data, including major emergencies such as a natural or man-made disaster, civil emergency, child abductions, severe weather watches and warnings, military activities, and law enforcement warnings.	Existing
<i>Requirement:</i>	Existing
4 The center shall provide the capability for a system operator to control the type and update frequency of emergency and wide-area alert information distributed to travelers.	Existing
<i>Element:</i> Iowa DOT 511 Traveler Information System	
<i>Entity:</i> Information Service Provider	
<i>Functional Area:</i> ISP Traveler Data Collection	
<i>Requirement:</i>	Existing
1 The center shall collect, process, and store traffic and highway condition information, including incident information, detours and road closures, event information, recommended routes, and current speeds on specific routes.	Existing
<i>Requirement:</i>	Existing
2 The center shall collect, process, and store maintenance and construction information, including scheduled maintenance and construction work activities and work zone activities.	Existing
<i>Requirement:</i>	Existing
3 The center shall collect, process, and store transit routes and schedules, transit transfer options, transit fares, and real-time schedule adherence information.	Existing
<i>Requirement:</i>	Existing
6 The center shall collect, process, and store weather information.	Existing
<i>Requirement:</i>	Existing
7 The center shall collect, process, and store event information.	Existing
<i>Functional Area:</i> Traveler Telephone Information	
<i>Requirement:</i>	Existing
1 The center shall provide the capability to process voice-formatted requests for traveler information from a traveler telephone information system, and return the information in the requested	Existing
<i>Requirement:</i>	Existing
2 The center shall provide the capability to process dual-tone multifrequency (DTMF)-based requests (touch-tone) for traveler information from a traveler telephone information system.	Existing

*Element:***Iowa DOT 511 Traveler Information System**

<i>Entity:</i> Information Service Provider	Functional Requirements
--	--------------------------------

Functional Area: **Traveler Telephone Information**

<i>Requirement:</i>	3 The center shall provide the capability to process traveler information requests from a traveler telephone information system.	Existing
<i>Requirement:</i>	4 The center shall collect and provide information on traffic conditions in the requested voice format and for the requested location.	Existing
<i>Requirement:</i>	5 The center shall collect and provide work zone and roadway maintenance information in the requested voice format and for the requested location.	Existing
<i>Requirement:</i>	7 The center shall collect and provide weather and event information in the requested voice format and for the requested location.	Existing
<i>Requirement:</i>	8 The center shall collect and provide transit service information in the requested voice format and for the requested location.	Existing
<i>Requirement:</i>	11 The center shall provide the capability to support both specific caller requests as well as bulk upload of regional traveler information.	Existing

Functional Area: **ISP Emergency Traveler Information**

<i>Requirement:</i>	1 The center shall collect and provide to the traveler interface systems emergency evacuation information, including evacuation zones, shelter information, available transportation modes, road closures and detours, changes to transit services, and traffic and road conditions at the origin, destination, and along the evacuation routes.	Existing
<i>Requirement:</i>	2 The center shall provide evacuation information to shelter providers.	Existing
<i>Requirement:</i>	3 The center shall collect and provide wide-area alert information to the traveler interface system with region-specific data, including major emergencies such as a natural or man-made disaster, civil emergency, child abductions, severe weather watches and warnings, military activities, and law enforcement warnings.	Existing
<i>Requirement:</i>	4 The center shall provide the capability for a system operator to control the type and update frequency of emergency and wide-area alert information distributed to travelers.	Existing

*Element:***Iowa DOT Ames Maintenance Garage**

*Entity:***Maintenance and Construction Management**

Functional Area: **MCM Environmental Information Collection**

<i>Requirement:</i>	1 The center shall remotely control environmental sensors that measure road surface temperature, moisture, icing, salinity, and other measures.	Existing
<i>Requirement:</i>	2 The center shall remotely control environmental sensors that measure weather conditions including temperature, wind, humidity, precipitation, and visibility.	Existing

Architecture	Status
AAMPO Regional ITS Architecture (Region)	(Region)
<i>Element:</i> Iowa DOT Ames Maintenance Garage	
<i>Entity:</i> Maintenance and Construction Management	Functional Requirements
<i>Functional Area:</i> MCM Environmental Information Collection	
<i>Requirement:</i>	Existing
4 The center shall assimilate current and forecast road conditions and surface weather information using a combination of weather service provider information (such as the National Weather Service and value-added sector specific meteorological services), data from traffic, emergency, and transit management, traveler information providers, and environmental data collected from sensors deployed on and about the roadway as well as the fleet of maintenance and construction vehicles.	
<i>Requirement:</i>	Existing
5 The center shall provide weather and road condition information to weather service providers and center personnel.	
<i>Requirement:</i>	Existing
6 The center shall respond to control data from center personnel regarding environmental sensor control and weather data collection and processing.	
<i>Requirement:</i>	Existing
7 The center shall collect operational status for the roadside and vehicle-based environmental sensor equipment.	
<i>Requirement:</i>	Existing
8 The center shall collect fault data for the roadside and vehicle-based environmental sensor equipment for repair.	
<i>Functional Area:</i> MCM Environmental Information Processing	
<i>Requirement:</i>	Existing
1 The center shall respond to control data from center personnel regarding environmental sensor control and weather data collection and processing.	
<i>Requirement:</i>	Existing
2 The center shall assimilate current and forecast road conditions and surface weather information using a combination of weather service provider information (such as the National Weather Service and value-added sector specific meteorological services) and local environmental sensor data.	
<i>Requirement:</i>	Existing
3 The center shall use the various data inputs of environmental sensors and road weather data to develop a view of current and predicted road weather and road conditions.	
<i>Requirement:</i>	Existing
4 The center shall disseminate current and forecasted road weather and road condition information to weather service providers (such as the National Weather Service and value-added sector specific meteorological services) as well as other agencies including traffic, emergency, and transit management, traveler information providers, rail operations centers, media, and other maintenance management centers.	
<i>Functional Area:</i> MCM Incident Management	
<i>Requirement:</i>	Existing
1 The center shall receive inputs from the Alerting and Advisory System concerning the possibility or occurrence of severe weather, terrorist activity, or other major emergency, including information provided by the Emergency Alert System.	
<i>Requirement:</i>	Existing
2 The center shall exchange alert information and status with emergency management centers. The information includes notification of a major emergency such as a natural or man-made disaster, civil emergency, or child abduction. The information may include the alert originator, the nature of the emergency, the geographic area affected by the emergency, the effective time period, etc.

<i>Functional Area:</i> MCM Incident Management	
<i>Requirement:</i>	
3 The center shall exchange incident and threat information with emergency management centers as well as traffic management centers; including notification of existence of incident and expected severity, location, time and nature of incident.	Existing
<i>Requirement:</i>	
4 The center shall coordinate planning for incidents with emergency management centers - including pre-planning activities for disaster response, evacuation, and recovery operations.	Existing
<i>Requirement:</i>	
5 The center shall respond to requests from emergency management to provide maintenance and construction resources to implement response plans, assist in clean up, verify an incident, etc. This may also involve coordination with traffic management centers and other maintenance centers.	Existing
<i>Requirement:</i>	
6 The center shall exchange road network status assessment information with emergency management and traffic management centers including an assessment of damage sustained by the road network including location and extent of the damage, estimate of remaining capacity, required closures, alternate routes, necessary	Existing
<i>Requirement:</i>	
7 The center shall provide work zone activities affecting the road network including the nature of the maintenance or construction activity, location, impact to the roadway, expected time(s) and duration of impact, anticipated delays, alternate routes, and suggested speed limits. This information may be augmented with images that provide a visual indication of current work zone status and traffic impacts.	Existing
<i>Requirement:</i>	
8 The center shall receive information indicating the damage sustained by transportation assets, derived from aerial surveillance, field reports, inspections, tests, and analyses to support incident management.	Existing
<i>Functional Area:</i> MCM Maintenance Decision Support	
<i>Requirement:</i>	
1 The center shall provide the center personnel with tailored external information, including weather or road condition observations, forecasted weather information or road conditions, current usage of treatments and materials, available resources, equipment and vehicle availability, road network information, and source reliability information.	Existing
<i>Requirement:</i>	
2 The center shall tailor the decision support information to include filtering (selection from a large amount of external information), error reduction ('smoothing' the information), fusion (combination of disparate information to match the decision	Existing
<i>Requirement:</i>	
3 The center shall provide an interface to the center personnel to input control parameters for the decision support process and receive decisions or information presentation.	Existing
<i>Requirement:</i>	
4 The center shall provide dispatch information to maintenance and construction vehicles based on the outputs of the decision	Planned

<i>Requirement:</i>	Existing
1 The center shall exchange alert information and status with emergency management centers. The information includes notification of a major emergency such as a natural or man-made disaster, civil emergency, or child abduction for distribution to the public. The information may include the alert originator, the nature of the emergency, the geographic area affected by the emergency, the effective time period, and information and instructions necessary for the public to respond to the alert. This may also identify specific information that should not be released to the public.	
<i>Requirement:</i>	Existing
2 The center shall coordinate planning for incidents with emergency management centers - including pre-planning activities for disaster response, evacuation, and recovery operations.	
<i>Requirement:</i>	Planned
3 The center shall support requests from emergency management centers to remotely control sensor and surveillance equipment located in the field, provide special routing for emergency vehicles, and to provide responding emergency vehicles with signal preemption.	
<i>Requirement:</i>	Existing
4 The center shall exchange incident and threat information with emergency management centers as well as maintenance and construction centers; including notification of existence of incident and expected severity, location, time and nature of incident.	
<i>Requirement:</i>	Existing
5 The center shall respond to requests from emergency management to provide traffic management resources to implement special traffic control measures, assist in clean up, verify an incident, etc. This may also involve coordination with maintenance centers.	
<i>Requirement:</i>	Existing
6 The center shall receive inputs concerning upcoming events that would effect the traffic network from event promoters, traveler information service providers, media, and rail operations centers.	
<i>Requirement:</i>	Planned
7 The center shall provide road network conditions and traffic images to emergency management centers, maintenance and construction centers, and traveler information service providers.	
<i>Requirement:</i>	Planned
9 The center shall coordinate information and controls with other traffic management centers.	
<i>Functional Area:</i> TMC Evacuation Support	
<i>Requirement:</i>	Existing
1 The center shall coordinate planning for evacuation with emergency management centers - including pre-planning activities such as establishing routes, areas to be evacuated, timing, etc.	

Architecture	Status
AAMPO Regional ITS Architecture (Region)	(Region)
<i>Element:</i> Iowa DOT District 1 Operations Office	
<i>Entity:</i> Traffic Management	
<i>Functional Area:</i> TMC Evacuation Support	
<i>Requirement:</i>	Existing
2 The center shall support requests from emergency management centers to preempt the current traffic control strategy, activate traffic control and closure systems such as gates and barriers, activate safeguard systems, or use driver information systems to support evacuation traffic control plans.	
<i>Requirement:</i>	Planned
3 The center shall coordinate information and controls with other traffic management centers.	
<i>Requirement:</i>	Existing
4 The center shall coordinate execution of evacuation strategies with emergency management centers - including activities such as setting closures and detours, establishing routes, updating areas to be evacuated, timing the process, etc.	
<i>Functional Area:</i> Traffic Maintenance	
<i>Requirement:</i>	Planned
1 The center shall collect and store sensor (traffic, pedestrian, multimodal crossing) operational status.	
<i>Requirement:</i>	Planned
2 The center shall collect and store CCTV surveillance system (traffic, pedestrian) operational status.	
<i>Requirement:</i>	Planned
3 The center shall collect and store sensor (traffic, pedestrian, multimodal crossing) fault data and send to the maintenance center for repair.	
<i>Requirement:</i>	Planned
4 The center shall collect and store CCTV surveillance system (traffic, pedestrian) fault data send to the maintenance center for repair.	
<i>Requirement:</i>	Planned
7 The center shall exchange data with maintenance centers concerning the reporting of faulty equipment and the schedule/status of their repair. Information exchanged includes details of new equipment faults, and clearances when the faults are cleared.	
<i>Functional Area:</i> Traffic Data Collection	
<i>Requirement:</i>	Existing
1 The center shall collect traffic management data such as operational data, event logs, etc.	
<i>Requirement:</i>	Existing
2 The center shall assign quality control metrics and meta-data to be stored along with the data. Meta-data may include attributes that describe the source and quality of the data and the conditions surrounding the collection of the data.	
<i>Requirement:</i>	Existing
3 The center shall receive and respond to requests from ITS Archives for either a catalog of the traffic data or for the data itself.	
<i>Requirement:</i>	Existing
4 The center shall be able to produce sample products of the data available.	
<i>Element:</i> Iowa DOT Motor Vehicle Division	
<i>Entity:</i> Commercial Vehicle Administration	
<i>Functional Area:</i> Credentials and Taxes Administration	
<i>Requirement:</i>	Existing
1 The center shall manage electronic credentials filing and processing for commercial vehicles.	
<i>Requirement:</i>	Existing
2 The center shall manage the filing of appropriate taxes for the operation of commercial vehicles.

AAMPO Regional ITS Architecture (Region)	(Region)
<i>Element:</i> Iowa DOT Motor Vehicle Division	
<i>Entity:</i> Commercial Vehicle Administration	Functional Requirements
<i>Functional Area:</i> Credentials and Taxes Administration	
<i>Requirement:</i>	
3 The center shall process requests for payments of electronic credentials and tax filing and maintain an interface to a Financial Institution.	Existing
<i>Requirement:</i>	
4 The center shall exchange credentials and tax information with other commercial vehicle administration centers - either in other states or the federal government.	Existing
<i>Requirement:</i>	
5 The center shall provide route restrictions information, including hazmat restrictions, to other centers and agencies for distribution to commercial vehicle operators. These centers and agencies may include commercial fleet and freight management operators, traveler information centers, digital map update providers, and other commercial vehicle administration centers.	Existing
<i>Requirement:</i>	
6 The center shall use information on asset restrictions received from maintenance centers to develop the commercial vehicle route restrictions and process credentials applications.	Existing
<i>Requirement:</i>	
7 The center shall provide an interface with commercial vehicle fleet and freight management centers to exchange audit and compliance review reports.	Existing
<i>Requirement:</i>	
8 The center shall provide credentials information about commercial vehicle operators and carriers to authorized requestors such as insurance agencies.	Existing
<i>Requirement:</i>	
9 The center shall receive and store information on commercial vehicle violations from enforcement agencies as part of the processing of credentials applications.	Existing
<i>Functional Area:</i> CV Information Exchange	
<i>Requirement:</i>	
1 The center shall exchange information with roadside check facilities, including credentials and credentials status information safety status information, daily site activity data, and citations.	Existing
<i>Requirement:</i>	
2 The center shall exchange safety and credentials data among other commercial vehicle administration centers; includes border clearance status, credentials information, credentials status information, and safety status information.	Existing
<i>Requirement:</i>	
3 The center shall package data concerning commercial vehicle safety and credentials into snapshots (top-level summary and critical status information).	Existing
<i>Requirement:</i>	
4 The center shall package data concerning commercial vehicle safety and credentials into profiles (detailed and historical data).	Existing
<i>Requirement:</i>	
5 The center shall provide commercial vehicle accident reports and citations to enforcement agencies.	Existing
<i>Requirement:</i>	
6 The center shall provide commercial vehicle credentials and safety status information to authorized requestors such as insurance agencies.	Existing
<i>Requirement:</i>	
7 The center shall provide reports to the commercial vehicle fleet manager regarding fleet activity through roadside facilities including accident reports, citations, credentials status information, and safety status information.	Existing

3 The field element shall collect sensor status and sensor faults from roadside equipment and send it along with the recorded data	Existing
<i>Element:</i> Iowa DOT Speed Detectors at RWIS Site	
<i>Entity:</i> Roadway Subsystem	
<i>Functional Area:</i> Roadway Basic Surveillance	
<i>Requirement:</i>	
1 The field element shall collect, process, digitize, and send traffic sensor data (speed, volume, and occupancy) to the center for further analysis and storage, under center control.	Planned
<i>Requirement:</i>	
4 The field element shall return sensor and CCTV system operational status to the controlling center.	Planned
<i>Requirement:</i>	
5 The field element shall return sensor and CCTV system fault data	Planned
<i>Element:</i> Iowa DOT TraCS System	
<i>Entity:</i> Archived Data Management Subsystem	
<i>Functional Area:</i> ITS Data Repository	
<i>Requirement:</i>	
1 The center shall collect data to be archived from one or more data sources.	Existing
<i>Requirement:</i>	
2 The center shall collect data catalogs from one or more data sources. A catalog describes the data contained in the collection of archived data and may include descriptions of the schema or structure of the data, a description of the contents of the data; e.g., time range of entries, number of entries; or a sample of the data (e. g. a thumbnail).	Existing
<i>Requirement:</i>	
3 The center shall store the archived data in a focused repository that is suited to a particular set of ITS data users.	Existing
<i>Requirement:</i>	
4 The center shall include capabilities for performing quality checks on the incoming archived data.	Existing
<i>Requirement:</i>	
5 The center shall include capabilities for error notification on the incoming archived data.	Existing
<i>Requirement:</i>	
6 The center shall include capabilities for archive to archive coordination.	Existing
<i>Requirement:</i>	
7 The center shall support a broad range of archived data management implementations, ranging from simple data marts that collect a focused set of data and serve a particular user community to large-scale data warehouses that collect, integrate, and summarize transportation data from multiple sources and serve a broad array of users within a region.	Existing
<i>Requirement:</i>	
8 The center shall perform quality checks on received data.	Existing
<i>Requirement:</i>	
9 The center shall provide the capability to execute methods on the incoming data such as cleansing, summarizations, aggregations, or transformations applied to the data before it is stored in the archive.	Existing
<i>Requirement:</i>	
10 The center shall respond to requests from the administrator interface function to maintain the archive data.	Existing

<i>Entity:</i> Emergency Management	
Functional Requirements	
<i>Functional Area:</i> Center Secure Area Surveillance	
<i>Requirement:</i>	Existing
2 The center shall remotely monitor video images and audio surveillance data collected in traveler secure areas, which include transit stations, transit stops, rest areas, park and ride lots, and other fixed sites along travel routes (e.g., emergency pull-off areas and travel information centers). The data may be raw or pre-processed in the field.	
<i>Requirement:</i>	Existing
5 The center shall identify potential security threats based on collected security surveillance data.	
<i>Requirement:</i>	Existing
8 The center shall remotely control security surveillance devices in traveler secure areas, which include transit stations, transit stops, rest areas, park and ride lots, and other fixed sites along travel routes (e.g., emergency pull-off areas and travel information centers).	
<i>Requirement:</i>	Existing
12 The center shall respond to control data from center personnel regarding security surveillance data collection, processing, threat	
<i>Functional Area:</i> Emergency Data Collection	
<i>Requirement:</i>	Existing
1 The center shall collect emergency service data, emergency vehicle management data, emergency vehicle data, sensor and surveillance data, threat data, and incident data.	
<i>Requirement:</i>	Existing
2 The center shall assign quality control metrics and meta-data to be stored along with the data. Meta-data may include attributes that describe the source and quality of the data and the conditions surrounding the collection of the data.	
<i>Requirement:</i>	Existing
3 The center shall receive and respond to requests from ITS Archives for either a catalog of the emergency management data or for the data itself.	
<i>Requirement:</i>	Existing
4 The center shall be able to produce sample products of the data available.	
<i>Entity:</i> Traffic Management	
<i>Functional Area:</i> TMC Traffic Information Dissemination	
<i>Requirement:</i>	Planned
1 The center shall remotely control dynamic messages signs for dissemination of traffic and other information to drivers.	
<i>Requirement:</i>	Planned
3 The center shall collect operational status for the driver information systems equipment (DMS, HAR, etc.).	
<i>Requirement:</i>	Planned
4 The center shall collect fault data for the driver information systems equipment (DMS, HAR, etc.) for repair.	
<i>Requirement:</i>	Planned
5 The center shall retrieve locally stored traffic information, including current and forecasted traffic information, road and weather conditions, traffic incident information, information on diversions and alternate routes, closures, and special traffic restrictions (lane/shoulder use, weight restrictions, width restrictions, HOV requirements), etc.	
<i>Requirement:</i>	Planned
6 The center shall distribute traffic data to maintenance and construction centers, transit centers, emergency management centers, and traveler information providers.

City of Ames CyRide RouteMatch Software	Planned
<i>Element:City of Ames CyRide</i>	
<i>Entity:Transit Management</i>	
<i>Functional Area: Transit Center Fixed-Route Operations</i>	
<i>Requirement:</i>	1 The center shall generate transit routes and schedules based on such factors as parameters input by the system operator, road network conditions, operational data on current routes and schedules, and digitized map data. Planned
<i>Requirement:</i>	2 The center shall provide the interface to the system operator to control the generation of new routes and schedules (transit services) including the ability to review and update the parameters used by the routes and schedules generation processes. Planned
<i>Requirement:</i>	3 The center shall be able to generate special routes and schedules to support an incident, disaster, evacuation, or other emergency. Planned
<i>Requirement:</i>	4 The center shall dispatch fixed route or flexible route transit vehicles. Planned
<i>Requirement:</i>	5 The center shall collect transit operational data for use in the generation of routes and schedules. Planned
<i>Requirement:</i>	6 The center shall provide instructions or corrective actions to the transit vehicle operators based upon operational needs. Planned
<i>Requirement:</i>	8 The center shall generate the necessary corrective actions which may involve more than the vehicles concerned and more far reaching action, such as, the introduction of extra vehicles, wide area signal priority by traffic management, the premature termination of some services, etc. Planned
<i>Requirement:</i>	9 The center shall exchange information with Maintenance and Construction Operations concerning work zones, roadway conditions, asset restrictions, work plans, etc. Existing
<i>Requirement:</i>	10 The center shall disseminate up-to-date schedules and route information to other centers for fixed and flexible route services. Planned
<i>Functional Area: Transit Vehicle Operator Scheduling</i>	
<i>Requirement:</i>	1 The center shall maintain records of a transit vehicle operator's performance. This may be done utilizing standardized performance evaluation criteria set forth by governmental regulations and transit operating company policies, assessing the transit vehicle operator's driving history, and assessing comments from the transit vehicle operator's supervisor(s) as well as noting any moving violations or accidents, supervisor comments, Existing
<i>Requirement:</i>	2 The center shall assess the transit vehicle operator's availability based on previous work assignments, accumulated hours, plus health and vacation commitments. Existing
<i>Requirement:</i>	3 The center shall assign transit vehicle operators to transit schedules based on their eligibility, route preferences, seniority, and transit vehicle availability. Existing

<i>Requirement:</i>	2 The field element shall activate automated roadway treatment systems under center control. Treatments can be in the form of fog dispersion, anti-icing chemicals, etc. Planned
<i>Requirement:</i>	3 The field element shall return automated roadway treatment system and associated environmental sensor operational status to the maintenance center. Planned
<i>Requirement:</i>	4 The field element shall return automated roadway treatment system and associated environmental sensor fault data to the maintenance center for repair. Planned
City of Ames RWIS	Planned
<i>Element:City of Ames Public Works</i>	
<i>Entity:Maintenance and Construction Management</i>	
<i>Functional Area: MCM Environmental Information Collection</i>	
<i>Requirement:</i>	1 The center shall remotely control environmental sensors that measure road surface temperature, moisture, icing, salinity, and other measures. Planned
<i>Requirement:</i>	2 The center shall remotely control environmental sensors that measure weather conditions including temperature, wind, humidity, precipitation, and visibility. Planned
<i>Requirement:</i>	4 The center shall assimilate current and forecast road conditions and surface weather information using a combination of weather service provider information (such as the National Weather Service and value-added sector specific meteorological services), data from traffic, emergency, and transit management, traveler information providers, and environmental data collected from sensors deployed on and about the roadway as well as the fleet of maintenance and construction vehicles. Planned
<i>Requirement:</i>	5 The center shall provide weather and road condition information to weather service providers and center personnel. Planned
<i>Requirement:</i>	6 The center shall respond to control data from center personnel regarding environmental sensor control and weather data collection and processing. Planned
<i>Requirement:</i>	7 The center shall collect operational status for the roadside and vehicle-based environmental sensor equipment. Planned
<i>Requirement:</i>	8 The center shall collect fault data for the roadside and vehicle-based environmental sensor equipment for repair. Planned
<i>Element:City of Ames Public Works RWIS</i>	
<i>Entity:Roadway Subsystem</i>	
<i>Functional Area: Roadway Environmental Monitoring</i>	
<i>Requirement:</i>	1 The field element shall include surface and sub-surface environmental sensors that measure road surface temperature, moisture, icing, salinity, and other measures. Planned

Architecture		Status
City of Ames RWIS		Planned
<i>Element:</i> City of Ames Public Works RWIS		
<i>Entity:</i> Roadway Subsystem		Functional Requirements
<i>Functional Area:</i> Roadway Environmental Monitoring		
<i>Requirement:</i>	2 The field element shall include environmental sensors that measure weather conditions including temperature, wind, humidity, precipitation, and visibility.	Planned
<i>Requirement:</i>	3 The field element's environmental sensors shall be remotely controlled by a maintenance center.	Planned
<i>Requirement:</i>	4 The field element's environmental sensors shall be remotely controlled by a traffic management center.	Planned
<i>Requirement:</i>	7 The field element shall provide environmental sensor equipment operational status to the controlling center or maintenance vehicle.	Planned
<i>Requirement:</i>	8 The field element shall provide environmental sensor equipment fault indication to the controlling center or maintenance vehicle.	Planned
<i>Requirement:</i>	10 The field element shall provide weather and road surface condition data to centers.	Planned
<i>Functional Area:</i> Roadway Data Collection		
<i>Requirement:</i>	1 The field element shall collect traffic, road, and environmental conditions information.	Planned
<i>Requirement:</i>	2 The field element shall include the sensors and supporting roadside devices that sense, collect, and send traffic, road, and environmental conditions information to a center for archival.	Planned
<i>Requirement:</i>	3 The field element shall collect sensor status and sensor faults from roadside equipment and send it along with the recorded data	Planned
<i>Element:</i> City of Ames Public Works Traffic and Maintenance Database		
<i>Entity:</i> Archived Data Management Subsystem		
<i>Functional Area:</i> ITS Data Repository		
<i>Requirement:</i>	1 The center shall collect data to be archived from one or more data sources.	Existing
<i>Requirement:</i>	2 The center shall collect data catalogs from one or more data sources. A catalog describes the data contained in the collection of archived data and may include descriptions of the schema or structure of the data, a description of the contents of the data; e.g., time range of entries, number of entries; or a sample of the data (e. g. a thumbnail).	Existing
<i>Requirement:</i>	3 The center shall store the archived data in a focused repository that is suited to a particular set of ITS data users.	Existing
<i>Requirement:</i>	4 The center shall include capabilities for performing quality checks on the incoming archived data.	Existing
<i>Requirement:</i>	5 The center shall include capabilities for error notification on the incoming archived data.	Existing
<i>Requirement:</i>	8 The center shall perform quality checks on received data.	Existing
<i>Requirement:</i>	9 The center shall provide the capability to execute methods on the incoming data such as cleansing, summarizations, aggregations, or transformations applied to the data before it is stored in the archive.	Existing

<i>Entity:Information Service Provider</i>	
<i>Functional Area: Interactive Infrastructure Information</i>	
<i>Requirement:</i>	Existing
1 The center shall collect, process, store, and disseminate customized traffic and highway condition information to travelers, including incident information, detours and road closures, recommended routes, and current speeds on specific routes upon request.	
<i>Requirement:</i>	Planned
2 The center shall collect, process, store, and disseminate customized maintenance and construction information to travelers, including scheduled maintenance and construction work activities and work zone activities upon request.	
<i>Requirement:</i>	Planned
15 The center shall manage updates of digitized map data and provide updates to traveler interface systems upon request.	
<i>Requirement:</i>	Planned
17 The center shall provide the capability for a system operator to control the type and update frequency of traveler information.	
<i>Element:User Personal Computing Devices</i>	
<i>Entity:Personal Information Access</i>	
<i>Functional Area: Personal Interactive Information Reception</i>	
<i>Requirement:</i>	Existing
1 The personal traveler interface shall receive traffic information from a center and present it to the traveler upon request.	
<i>Requirement:</i>	Existing
10 The personal traveler interface shall base requests from the traveler on the traveler's current location or a specific location identified by the traveler, and filter the provided information accordingly.	
<i>Requirement:</i>	Existing
11 The personal traveler interface shall provide digitized map data to act as the background to the information presented to the traveler.	
<i>Requirement:</i>	Existing
12 The personal traveler interface shall support traveler input in audio or manual form.	
<i>Requirement:</i>	Existing
13 The personal traveler interface shall present information to the traveler in audible or visual forms consistent with a personal device, and suitable for travelers with hearing and vision physical	
Consolidated 911 Computer Aided Dispatch	Planned
<i>Element:City of Ames Police Communications Center</i>	
<i>Entity:Emergency Management</i>	
<i>Functional Area: Emergency Call-Taking</i>	
<i>Requirement:</i>	Existing
1 The center shall support the interface to the Emergency Telecommunications System (e.g. 911 or 7-digit call routing) to receive emergency notification information and provide it to the emergency system operator.	
<i>Requirement:</i>	Existing
2 The center shall receive emergency call information from 911 services and present the possible incident information to the emergency system operator.	
<i>Requirement:</i>	Existing
3 The center shall receive emergency call information from motorist call-boxes and present the possible incident information to the emergency system operator.

<i>Requirement:</i>	
2 The center shall remotely control environmental sensors that measure weather conditions including temperature, wind, humidity, precipitation, and visibility.	Existing

Architecture	Status
Iowa DOT Precipitation and Visibility Sensors	Planned
<i>Element:</i> Iowa DOT Ames Maintenance Garage	
<i>Entity:</i> Maintenance and Construction Management	Functional Requirements
<i>Functional Area:</i> MCM Environmental Information Collection	
<i>Requirement:</i>	
4 The center shall assimilate current and forecast road conditions and surface weather information using a combination of weather service provider information (such as the National Weather Service and value-added sector specific meteorological services), data from traffic, emergency, and transit management, traveler information providers, and environmental data collected from sensors deployed on and about the roadway as well as the fleet of maintenance and construction vehicles.	Existing
<i>Requirement:</i>	
5 The center shall provide weather and road condition information to weather service providers and center personnel.	Existing
<i>Requirement:</i>	
6 The center shall respond to control data from center personnel regarding environmental sensor control and weather data collection and processing.	Existing
<i>Requirement:</i>	
7 The center shall collect operational status for the roadside and vehicle-based environmental sensor equipment.	Existing
<i>Requirement:</i>	
8 The center shall collect fault data for the roadside and vehicle-based environmental sensor equipment for repair.	Existing
<i>Element:</i> Iowa DOT RWIS Central System	
<i>Entity:</i> Archived Data Management Subsystem	
<i>Functional Area:</i> Traffic and Roadside Data Archival	
<i>Requirement:</i>	
1 The center shall manage the collection of archive data directly from collection equipment located at the roadside.	Existing
<i>Requirement:</i>	
3 The center shall collect environmental sensor information that from roadside devices.	Existing
<i>Requirement:</i>	
4 The center shall respond to requests from the Archive Data Administer to input the parameters that control the collection process.	Existing
<i>Requirement:</i>	
5 The center shall send the request for data and control parameters to the field equipment where the information is collected and returned.	Existing
<i>Requirement:</i>	
6 The center shall record the status about the imported traffic and roadside data.	Existing
<i>Requirement:</i>	
7 The center shall use the status information to adjust the collection	Existing
<i>Functional Area:</i> Government Reporting Systems Support	
<i>Requirement:</i>	
1 The center shall provide data from an ITS archive to federal, state, or local government reporting systems.	Existing
<i>Requirement:</i>	
2 The center shall provide the capability to select data from an ITS archive for use in government reports.	Existing
<i>Requirement:</i>	
3 The center shall provide the capability to format data from an ITS archive suitable for input into government reports.	Existing
<i>Requirement:</i>	
4 The center shall support requests for ITS archived data from Government Reporting Systems.	Existing

Architecture	Status
Iowa DOT Precipitation and Visibility Sensors	Planned
<i>Element:</i> Iowa DOT RWIS Central System	
<i>Entity:</i> Archived Data Management Subsystem	
<i>Functional Area:</i> Government Reporting Systems Support	
<i>Requirement:</i> 5 The center shall provide the applicable meta-data for any ITS archived data to satisfy government reporting system requests. Meta-data may include attributes that describe the source and quality of the data and the conditions surrounding the collection of the data.	Existing
<i>Element:</i> Iowa DOT RWIS Stations	
<i>Entity:</i> Roadway Subsystem	
<i>Functional Area:</i> Roadway Environmental Monitoring	
<i>Requirement:</i> 1 The field element shall include surface and sub-surface environmental sensors that measure road surface temperature, moisture, icing, salinity, and other measures.	Existing
<i>Requirement:</i> 2 The field element shall include environmental sensors that measure weather conditions including temperature, wind, humidity, precipitation, and visibility.	Existing
<i>Requirement:</i> 3 The field element's environmental sensors shall be remotely controlled by a maintenance center.	Existing
<i>Requirement:</i> 7 The field element shall provide environmental sensor equipment operational status to the controlling center or maintenance vehicle.	Existing
<i>Requirement:</i> 8 The field element shall provide environmental sensor equipment fault indication to the controlling center or maintenance vehicle.	Existing
<i>Requirement:</i> 10 The field element shall provide weather and road surface condition data to centers.	Existing
<i>Functional Area:</i> Roadway Data Collection	
<i>Requirement:</i> 1 The field element shall collect traffic, road, and environmental conditions information.	Existing
<i>Requirement:</i> 2 The field element shall include the sensors and supporting roadside devices that sense, collect, and send traffic, road, and environmental conditions information to a center for archival.	Existing
<i>Requirement:</i> 3 The field element shall collect sensor status and sensor faults from roadside equipment and send it along with the recorded data	Existing
<i>Element:</i> Iowa DOT WeatherView Website	
<i>Entity:</i> Information Service Provider	
<i>Functional Area:</i> ISP Traveler Data Collection	
<i>Requirement:</i> 1 The center shall collect, process, and store traffic and highway condition information, including incident information, detours and road closures, event information, recommended routes, and current speeds on specific routes.	Planned

Functional Requirements	
<i>Functional Area:</i> Basic Information Broadcast	
<i>Requirement:</i>	Planned
1 The center shall collect, process, store, and disseminate traffic and highway condition information to travelers, including incident information, detours and road closures, event information, recommended routes, and current speeds on specific routes.	
<i>Requirement:</i>	Existing
6 The center shall collect, process, store, and disseminate weather information to travelers.	
<i>Requirement:</i>	Existing
10 The center shall provide the capability for a system operator to control the type and update frequency of broadcast traveler information.	
Iowa DOT Speed Detectors at RWIS Site	Planned
<i>Element:</i> Iowa DOT Ames Maintenance Garage	
<i>Entity:</i> Traffic Management	
<i>Functional Area:</i> Collect Traffic Surveillance	
<i>Requirement:</i>	Planned
1 The center shall monitor, analyze, and store traffic sensor data (speed, volume, occupancy) collected from field elements under remote control of the center.	
<i>Requirement:</i>	Planned
4 The center shall distribute road network conditions data (raw or processed) based on collected and analyzed traffic sensor and surveillance data to other centers.	
<i>Requirement:</i>	Planned
5 The center shall respond to control data from center personnel regarding sensor and surveillance data collection, analysis, storage, and distribution.	
<i>Requirement:</i>	Planned
6 The center shall maintain a database of surveillance and sensors and the freeways, surface street and rural roadways, e.g. where they are located, to which part(s) of the network their data applies, the type of data, and the ownership of each link (that is, the agency or entity responsible for collecting and storing surveillance of the link) in the network.	
<i>Requirement:</i>	Existing
7 The center shall support an interface with a map update provider, or other appropriate data sources, through which updates of digitized map data can be obtained and used as a background for traffic data.	
<i>Functional Area:</i> Traffic Maintenance	
<i>Requirement:</i>	Planned
1 The center shall collect and store sensor (traffic, pedestrian, multimodal crossing) operational status.	
<i>Requirement:</i>	Planned
3 The center shall collect and store sensor (traffic, pedestrian, multimodal crossing) fault data and send to the maintenance center for repair.	
<i>Requirement:</i>	Existing
7 The center shall exchange data with maintenance centers concerning the reporting of faulty equipment and the schedule/status of their repair. Information exchanged includes details of new equipment faults, and clearances when the faults are cleared.

<i>Requirement:</i>	Planned
3 The emergency vehicle shall provide an interface to the center for emergency personnel to transmit information about the current incident response status such as the identification of the resources	
<i>Element:</i> Mary Greeley Medical Center Dispatch	
<i>Entity:</i> Emergency Management	
<i>Functional Area:</i> Emergency Call-Taking	
<i>Requirement:</i>	Existing
1 The center shall support the interface to the Emergency Telecommunications System (e.g. 911 or 7-digit call routing) to receive emergency notification information and provide it to the emergency system operator.	
<i>Requirement:</i>	Existing
2 The center shall receive emergency call information from 911 services and present the possible incident information to the emergency system operator.	
<i>Requirement:</i>	Existing
5 The center shall receive emergency notification information from other public safety agencies and present the possible incident information to the emergency system operator.	
<i>Requirement:</i>	Existing
9 The center shall forward the verified emergency information to the responding agency based on the location and nature of the emergency.	
<i>Requirement:</i>	Existing
10 The center shall update the incident information log once the emergency system operator has verified the incident.	
<i>Functional Area:</i> Emergency Dispatch	
<i>Requirement:</i>	Planned
1 The center shall dispatch emergency vehicles to respond to verified emergencies under center personnel control.	
<i>Requirement:</i>	Planned
2 The center shall store the current status of all emergency vehicles available for dispatch and those that have been dispatched.	
<i>Requirement:</i>	Planned
3 The center shall relay location and incident details to the responding vehicles.	
<i>Requirement:</i>	Planned
5 The center shall store and maintain the emergency service responses in an action log.	
<i>Requirement:</i>	Planned
6 The center shall provide the capability for digitized map data to act as the background to the information presented to the emergency system operator.	
<i>Requirement:</i>	Planned
9 The center shall coordinate response to incidents with other Emergency Management centers to ensure appropriate resources are dispatched and utilized.	
<i>Functional Area:</i> Incident Command	

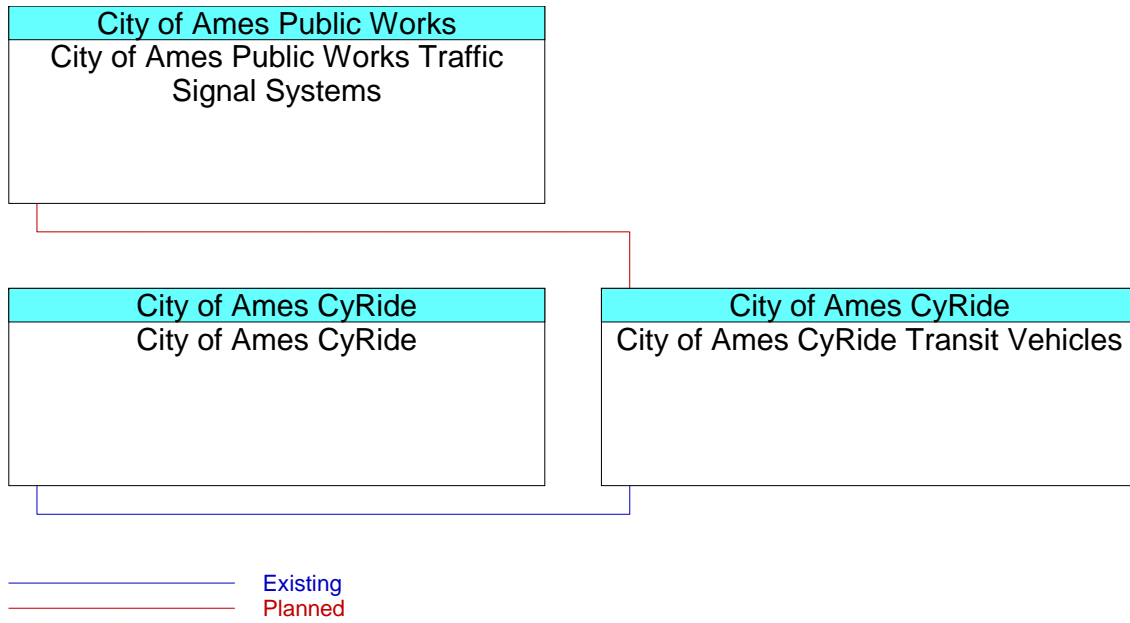

Architecture		Status
Mary Greeley Medical Center Dispatch Upgrade		Planned
<i>Element:</i> Mary Greeley Medical Center Dispatch		
<i>Entity:</i> Emergency Management
