**Safe Routes to School Additional Information**

Safe Routes to School is a national program that encourages youth and their families to choose walking, bicycling, and other active ways to get to and from school. The program can be tailored to meet the needs of the schools and the community. This comprehensive program includes the 5 Es: engineering, education, encouragement, enforcement, and evaluation; projects must address all five of these components. The purpose of SRTS is to enable and encourage children, including those with disabilities, to walk and bicycle to school; make walking and bicycling to school safe and more appealing; and facilitate the planning, development and implementation of projects that will improve safety, and reduce traffic, fuel consumption, and air pollution in the vicinity of schools. More information can be found at the following resources:

Iowa Department of Transportation
