

Lawn Soil Quality Improvement Cost Share Program

SMART
WATERSHEDS

CITY OF
Ames™

The City of Ames has implemented a Smart Watershed Program to increase local awareness of the importance of protecting our local streams and lakes. It is promoting methods to capture, infiltrate, and reduce storm water runoff in residential areas. Applying compost and Aeration to yards helps reduce compaction and increases infiltration resulting in less runoff.

Why Soils Need to be Improved.

Iowa soils have been significantly altered by tillage for farming and grading practices associated with urban development. Years of tillage and soil erosion has caused the loss of more than half of Iowa's topsoil. The organic matter content has been reduced from a healthy, sponge-like 10% to less than 2%. Often remaining topsoil is completely removed during development for urban growth. Little to no organic matter remains and the graded soils are compacted. Compacted soils with no organic matter causes nearly all the water to runoff during rainfall. Stormwater runoff flows untreated to storm sewers, and washes associated pollutants directly into nearby streams, rivers, lakes and watershed.

Direct Benefits of Soil Quality Improvements

A compacted, nutrient poor soil with low organic matter content also requires more time and money to stay green! Doing soil quality improvements will help you create a beautiful, healthy lawn that requires less water and reduced fertilizer and pesticide applications.

Can I Make Soil Quality Improvements to my Yard?

Anyone can make soil quality improvements to their yard. The City of Ames is now offering a cost share program. In order to qualify for this program you must meet some simple criteria. The participant must be a City of Ames utility customer. The owner of the property needs to approve of the improvements and sign the application form. This program requires all three improvements be done which include aeration, adding ½" compost, and seeding. Physical activity is involved if you do the work yourself. You are allowed to hire the aeration or topdressing to be done by a contractor however the overall cost of the project will increase greatly. By having a contractor aerate the property and spreading the compost and seed yourself, you are able to will greatly reduce overall costs. You must agree to improve the soil on a minimum 650 square feet to qualify.

Want to Learn More About the Soil Quality Improvement Program?

The City of Ames is offering a rebate of up to \$350 for the improvements to green spaces within city limits. The program will cost share materials cost. Preapproval is necessary to ensure reimbursement will be available. To qualify one must complete the following steps:

Soil Quality Improvement Steps

1. Identify which areas in your yard you would like aerate, compost and seed.
 - Minimum size allowed for the cost share is 650 square feet.
 - No maximum size limits but the maximum rebate is \$350
 - Must do all three improvements
 - Aeration
 - Cover area with ½" Compost
 - Seed with grass seed
2. Fill out a City of Ames Lawn Soil Quality Improvement Application.
 - Measurements and drawing of your yard shall be submitted with the application form.
 - After receiving and reviewing the application, the City of Ames will notify you of your eligibility for this program.
 - Funding is limited and preapproval is necessary to ensure reimbursement will be available.
3. The Public Works Department will review the application and notify you when the application has been approved. You must complete your project within 30 days of approval. This program will begin July 1st 2013.
4. If approved the next step is to Contact Iowa One Call 1-800-292-8989 to have your yard flagged to identify the location of utilities. Some phone lines are extremely shallow in the ground and should be avoided when aerating.
5. **The Ames Lawn Soil Quality cost share program can be used towards the purchase of the following:**
 - a. Paying Contractors to do some of the work or all of the work for you.
 - b. Rental of a aerator
 - c. Compost
 - d. Seed
 - e. Delivery of the Compost
6. To get your rebate, provide a picture of the completed project along with receipts for materials such as compost, and seed. After final project approval a check will then be mailed to you.
