

QUESTIONS REGARDING ANNEXATION

What will be the zoning of my property after annexation and what does that mean? Will it have to change?

Upon annexation, a property is automatically zoned A-Agriculture. It will remain A-Agriculture until action by the City Council to change the zoning map. According to Ames City Code, the property owner, the Planning and Zoning Commission, or the City Council can initiate a zoning map change.

The property will be subject to all the zoning requirements of the City. For any specific question about how the requirements impact a particular property, please contact the Planning Division. However, a residential property in the A-Agriculture zoning district would be allowed to maintain that use indefinitely. If damaged or destroyed, a residential use could be re-established subject to the zoning requirements regarding setback, height, etc. There may be greater restrictions than the county would have on accessory and out buildings.

Inside the City, there are other restrictions that are often not found in the county. For example, discharging a firearm (except on agricultural land) and the burning of garbage is prohibited.

Am I required to disconnect from Central Iowa Water Association and hook up to water service when it comes near my property? Will there be connection fees? Can I connect to the new water main with my existing service line? What inspections will I need?

There is no requirement to connect to city water upon annexation unless you are subject to a covenant with the City of Ames to connect and pay the costs associated with the buyout of rural water. You may continue to use a well or, if you are already an existing CIWA customer, you may continue to purchase water from CIWA. If you choose to connect to the City of Ames water system, you may have to pay the costs of buying out water service territory from CIWA.

If you choose to connect to the public water system, you may be subject to an inspection of your plumbing system to determine whether the system has adequate venting and backflow protection to protect the public water system. You will need to correct any deficiencies found in that inspection prior to connecting to the public water system. It may be possible to use your existing service lines if it can be verified that they are made of approved materials and are in a safe condition. Any connection will need a plumbing permit and an inspection.

Am I required to hook up to the sanitary sewer when it comes near my property? Will there be connection fees? What inspections will I need?

A connection to the City sanitary sewer system is required only if the existing system needs to be repaired and it is within 200 feet of a public sanitary sewer.

The owner will need to obtain a plumbing permit and the connection is subject to review by the Inspections Division.

The Story County Environmental Health Department does not determine if the septic system is functioning at the time of annexation, nor does the City. The County does inspect on-site septic systems when a house with a septic system is sold, whether it is in the city or out in the county.

If an on-site septic system is abandoned, the septic tank shall be pumped, the tank lid crushed into the tank, and the tank filled with sand or soil. The Story County Environmental Health Department can provide further information.

How will my taxes change after annexation?

After annexation, your property will be subject to the City of Ames levy, but no longer subject to the Rural Service Basic levy. Other levies, for example school district and county, will remain. The total levy for properties in Ames and in the Ames Community School District (for taxes payable July 1, 2016 through June 30, 2017) is \$31.65760 per \$1,000 of taxable valuation. This compares with \$25.17619 per \$1,000 of taxable valuation for property owners in Grant Township in the Ames Community School District. The new levy will not be applied immediately upon annexation but will appear in your property tax statements about 20 months after the first day of the year that the City assessor revalues the property. The Story County web site has a tool to help you estimate your taxes, based on the city and school district in which your property is located. It can be found at: <http://www.storycountyiowa.gov/index.aspx?nid=968>.

Can I continue to heat using LP gas? Am I required to connect to natural gas? If so, when will that be brought to my property?

There are no prohibitions on LP tanks in the A-Agriculture zoning district. If you were to seek a change in zoning to some other residential district, there may be restrictions and be subject to the approval of the Ames Fire Department.

The City's natural gas provider is Alliant Energy. Under the terms of the franchise agreement, the provider must provide natural gas to the property line of anyone who requests in writing to Alliant Energy, to be served. If you wish to connect to natural gas, you will need a permit from the City and have the work inspected.

Under what circumstances can I get a burn permit for trees and brush? Are there fees?

The burning of yard waste is prohibited unless you apply for and obtain a burn permit from the Ames Fire Department. When evaluating an application for a burn permit, the Shift Commander will look at a number of factors, such as hydrant location, fire department access, proximity to combustibles, weather conditions, etc. There is no guarantee that a permit will be issued but the

department will always do their best to work with you to find a solution. There is no fee for a burn permit.

I have a building under construction. If I am annexed prior to finishing it, will I need permits to complete it?

The County and the City have different permitting requirements and every project is unique. Please coordinate directly with the Ames Inspection Division to determine permitting needs. Also, please contact the Planning Division to determine zoning requirements for your project.
