

Ames Native Landscaping Rebate Program

The City of Ames has implemented a Smart Watershed Program to increase local awareness of the importance of protecting our local streams and lakes. It is promoting methods to capture, infiltrate, and reduce storm water runoff in residential areas. Native landscaping can be used in residential yards to restore soil quality and therefore reduce the amount of runoff.

The Benefits of Native Landscaping

The use of native plants in modern landscapes provides a connection to our prairie heritage. Once established, native plants are aesthetically pleasing and require little watering, fertilizing, and mowing. The reduced maintenance can lead to significant cost savings when compared to labor-intensive turf grass. Native landscaping attracts songbirds, dragon flies, butterflies and other desirable species and also helps reduce the problems associated with geese around urban ponds. Most important, it helps restore soil quality over time and helps landscapes absorb more rainfall, reducing the amount of runoff from urban spaces.

Can I put Native landscaping in My Yard?

Almost anyone can have native landscaping if they have the space available and are City of Ames utility customers. There are three options for native landscaping in yards: plant native prairie or woodland plants in gardens for a manicured look, plant a "Patch-of-Prairie" for a natural look, or plant native turf for a low maintenance lawn.

Native landscaping requires a 4 ft border where it approaches homes sidewalks and neighboring parcels. A 50 foot setback is required on corner lots where streets meet. Certain listed species are only allowed for this program. A minimum 100 square foot area and a maximum of 50% of the green space in your yard can be planted with native plants. Native turf mowed regularly such as Buffalo Grass or Blue Grama has no size limit. The first couple years the native plants develop roots. Annual weeds often dominate new plantings. Keep competing vegetation mowed to a height of six to eight inches, allowing sunlight to reach the smaller natives. By the third year the natives should start to flourish and out compete other weedy plants. Mowing for weed control should only need to be done every fall mowing at a 6" height.

It is recommended that homeowners check with neighborhood associations to clarify covenants addressing vegetation. **Native plant landscaped areas MUST be maintained similar to horticultural gardens! Owner must agree to maintain the native plant landscaped area by pruning back all vegetation in the fall or spring. Weeds must be removed from the area. Refer to the following for weed identification:**

Want to Learn More About The Native Landscaping Program?

The City of Ames is offering a rebate of up to \$350 for the installation of native landscaping within city limits. The program will cost share materials cost. Preapproval is necessary to ensure reimbursement will be available. To qualify one must complete the following steps:

Native Landscaping Program Steps

1. Identify areas of your yard where gardens can be installed.
 - Minimum size allowed for the cost share is 100 Square feet.
 - Maximum size allowed for cost share is 50% of total green space in your yard.
 - Must have and maintain a minimum of 4 feet of mowed border around native landscaping next to bordering parcels, home and sidewalks.
 - Native turf mowed regularly such as Buffalo Grass or Blue Grama has no size limitation.
 - Only native turf can be planted in the right-of-way
2. Fill out a City of Ames Native Landscaping Application.
 - Measurements and drawing of your yard shall be submitted with the application form.
 - Species being planted must meet the list provided by the City of Ames.
 - After receiving and reviewing the application, you will be contacted by the City of Ames to notify you of your eligibility for this program.
 - Funding is limited and preapproval is necessary to ensure reimbursement will be available.
3. The Public Works Department will review the application and notify you when the application has been approved and you can proceed with construction of your Native Plantings. You must complete your project within 30 days of approval. This program will begin July 1st 2013.
4. If approved the next step is to Contact Iowa One Call 1-800-292-8989 to have your yard flagged for utilities prior to tilling or digging in your yard.
5. Spray your yard with round up type spray to kill off vegetation in area to be planted with natives. You can also cover with plastic or other materials to kill vegetation.
 - Do not spray on windy days. Be careful of overspray onto neighboring properties.
6. Wait ten to fifteen days until vegetation has died off and then Rototill and broadcast/hand seed or plant plugs and/or plants.
 - If planted as a garden use wood mulch for weed control and moisture retention.
 - If planted as a "Patch-of-Prairie" or native turf add shredded straw mulch to help prevent erosion and help natives become established.
 - Recommended spacing for most native plants/plugs is 12-18 Inches, depending on species.
7. **The Ames Native Landscaping cost share program can be used towards the purchase of the following:**
 - a. Native seed, plugs, container plants or a combination.
 - b. Rental of a rototiller and/or sod cutter
 - c. Straw or wood mulch.
 - d. Weed/grass killing herbicides
8. To get your rebate, provide a picture of the completed project, seed and plant tags along with the receipts for purchase materials and equipment rental to the Public Works Department.
9. After final project approval a check will then be mailed to you.

CUSTOMER AGREEMENT	
I certify that I am a customer of the City of Ames utilities, and that this Native Planting was completed after July 1, 2013 in the yard at the address specified above. I acknowledge that I planted native lowa prairie and/or woodland plants using approved methods and that these measures will help improve the infiltration capacity of my yard resulting in less runoff of stormwater generated from my lawn. Additional benefits include minimizing fertilizer use and lawn irrigation. I agree to maintain this area according to the guidelines provided by the City. I have read and agree to the Terms and Conditions on the back of this form. All statements made in this application are correct. I understand that City of Ames reserves the right to inspect and verify this native plant landscaping improvement before issuing a rebate.	
Customer Signature	Date
Include model number(s) and, if available, serial number(s), copy of sales receipt, along with completed claim form (if required), and mail within 30 days of installation to City of Ames Rain Barrel Program, PO Box 811 or 515 Clark Ave., Ames, IA 50010.	

IMPORTANT: Please read "Terms and Conditions" on the reverse side before completing this form.

For City of Ames Use Only

Amount \$ _____ Date Verified _____ Verified By _____ Approved _____

Account No. Public Works _____

- Participant must be a City of Ames utilities customer. Homeowners and businesses are eligible upon application by owner. (This excludes contractors)
- Native landscaping must be installed after July 1, 2013
- The Maximum rebate allowed is \$350
