

Why can I view Plans, but not submit them?

Plans in CSS describe anything that you would apply for through the Planning Division. We have not yet set the Planning Department up in CSS. You are able to view past and present Planning projects but cannot submit them online. If you are wanting to submit plans for your building project, you can do so by searching for your building permit and adding the plans as an attachment. Commercial building permits still require printed plan sets. You may upload the plans as an attachment, but you will also need to submit a hard copy to the Plans Examiner.
