

Inspection times

Why does my inspection time say 8:00 a.m. or 1:00 p.m.? I thought the window was 9:30-11:30 a.m. and 1:30-3:30 p.m.? When choosing an inspection time, you will only need to choose whether you want the morning timeframe (AM) or afternoon timeframe (PM). The software program automatically assigns an hour to the timeframe. Please ignore the hour and only use the AM or PM timeframe. For example, if you choose AM, the software may show the inspection occurring at 12 AM. We promise to not be there at 12 AM! We will be there between 9:30 and 11:30 a.m.
