

Ames Parks and Recreation has replaced 2 treadmills and 2 elliptical trainers with 3 Point Play funding!

The Precor EFX 576i elliptical trainer features 14 programs, total body moving arms, multiple feedback options, and an adjustable ramp in a durable, compact machine. The CrossRamp combines with Total Body for a more effective workout. Working out on a Precor EFX 576i elliptical crosstrainer yields significantly more glute and quad activity than using a stairmaster, cycle, or treadmill. Users can select a ramp angle between 13 and 40 degrees throughout the workout to isolate and cross train quadriceps, glutes, hamstrings and calves. Stride lengths vary along the incline, from 21.2 to 24.7 inches, for a smooth comfortable workout.

The 95T Treadmill is where style meets substance. A sophisticated design that sets your facility apart and provides users with a full set of features to keep them motivated. It embodies our total commitment to creating exceptional exercise equipment that excites and inspires users. Everything about the 95T Treadmill from the DX3™ Belt and Deck System and Flexdeck™ technology to the sophisticated design and open sightlines to the Activity Zone that places the most-used controls at the user's finger tips, is designed to deliver the ultimate cardio experience.

Our most popular workouts are integrated into a contemporary industrial design with high-performing durability and a simple, non-intimidating console. This familiar, trusted machine is used today by thousands of world-class facilities all over the globe, and with good reason, it delivers.

With the latest aesthetic and entertainment upgrades, all of our Integrity Series cardio products now offer an even more compelling user experience. New iPod® compatibility and integrated iPod/TV controls keep exercisers motivated and entertained throughout their workout.
